

PROFILE

Nine years at Toyota Motor Korea. Owned both customer relationships and product lifecycle across the Toyota and Lexus brands. Turned service-touchpoint data into segmentation, tiering and loyalty structures to optimize CLV, and took full ownership of products from launch through growth and retention. Two flagship projects: localized Lexus's global loyalty program Encore into 'Lexus Amazing Members,' and led an after-sales DX that unified fragmented dealer data into the brand app — digitizing 100% of the service process and reaching ~90% new-car app sign-up (2025), ~90k total members and 15k–20k MAU.

EXPERTISE & PROJECTS

Toyota Motor Korea · Brand & Marketing PM · 2017–Present · Seoul

- CRM & Customer Loyalty** Turning customer relationships into data assets

2024–2025

Brand Loyalty Program — Lexus Amazing Members

Proposed to HQ a Korea-specific program designed from the ground up — rather than adapting the global Encore — and won approval; led the design and launch of 'Lexus Amazing Members' as PM. Started with flagship-model customers to validate response, then expanded to all models. VIP-care brand image 12.8 → 15.8 (+3.0p, exceeded 14.6 target, overtook Audi in category — internal brand tracking survey).
- Customer Engagement** Service-touchpoint data into marketing assets

2017–2019

Customer Brand Journey Service

Built a system linking service-touchpoint data — from maintenance and consultation — to marketing strategy. Responded by age-based segment, laying the groundwork for later data-driven decisions.
- Digital Transformation** Unifying offline into a digital 1:1 channel

2021–2026

Customer After-Sales DX

Unified customer data scattered across dealers into the brand app and converted service booking from 100% offline to 20% online. Achieved ~90% new-car app sign-up (2025), ~90k total members and 15k–20k MAU.
- Brand Strategy** Designing long-term direction & market entry

2025–Present

Brand Mid/Long-Term Strategy (Electrified) In progress

Engaged in electrification from the 2021 EV CFT through the current TFT as a core member. Designed phased market-entry scenarios and infrastructure strategy, and established a brand roadmap differentiated from competitors.
- Product Ownership & Lifecycle** Owning products from launch through growth & retention

2019–2026 Q1

Core Product Launch & Lifecycle — Lexus RX · LM

Owned Lexus RX and LM as Product Owner. RX pre-orders 131% of plan; LM hit 100% of the 5-month pre-order target. Premium brand image lifted from 19.5 → 22.4.

BRAND CONSULTING

Raison D'être

2020–Present

Patisserie · Independent Consultant · Personal project

Integrated consulting across brand, CX, SNS and operations for an independent patisserie with strong products but no clear way to reach customers — proposing and executing an experience-first direction beyond taste. Participated in the brand's expansion from one store to three across key Seoul districts; grew Instagram to 10k followers.
